

Liability Insurance Package for DANZ Members

Design is a key component in today's society, combining problem-solving and complex creativity to create concise design plans ready for execution. However, risk is inherent in both change itself and the design profession. For example:

- Unclear designs
- Poor input from other professionals
- Unrealistic client expectations
- Changing regulations

All of the above can all result in design problems and allegations of professional negligence from an unhappy client, who then seeks financial compensation.

To ensure you have legal and financial backing to defend and/or settle such a claim, DANZ has asked leading insurance broker, Aon, to secure a comprehensive and competitive Professional Indemnity cover available.

Aon are insurance and risk consultants that provide specialised liability insurance facilities to the design profession. We have been in partnership with DANZ for a number of years and have put together an insurance package specifically for DANZ members.

DANZ strongly recommends that all working members hold adequate Professional Indemnity insurance to pay for legal defence costs, plus any settlements or awards of damages that might be held in court.

DANZ integrated liability insurance programme offers members a choice of Limits for their "PI" protection PLUS the addition of the following companion covers at no extra costs:

- Internet Liability
- General Liability
- Statutory Liability
- Employer Liability
